

Saddam Hussein Intelligence Training

Field Examination

In an effort to maintain morale and keep tabs on the level of devotion to the cause of resisting the Satanist War-Mongers as felt by the peace-loving Iraqi people, the Saddam Hussein Institute of Tactics (commonly referred to as the S.H.I.T. house) has declared that this examination be administered to all peace-loving people under attack by the Infidel Yankee Dogs.

1. You are stationed near a government peace-keeping facility outside Baghdad. A blasphemous 2,000 lb bomb hits the facility sending 250 of your peace-loving brethren to paradise. Your correct response would be to:
 - A. Sift through the wreckage for anything of value.
 - B. Remove the excrement from your pajamas.
 - C. Throw down your weapons and run to the nearest border.
 - D. Praise ALLAH and declare victory!
2. You have been given the mission of sending a message of peace to the war-mongering Israeli's via your SCUD mobile launch platform. As you prepare for launch, you notice one of Satan's FB-111 aircraft rapidly approaching your position. In the last 15 seconds you have before you go to paradise, you should:
 - A. Throw as many rocks as possible to deter the incoming aircraft.
 - B. Try to convey your intentions to surrender.
 - C. Try to run the 400 or so yards to escape the blast.
 - D. Praise ALLAH and declare victory!
3. You are the proud peace-loving pilot of an Iraqi MiG-29 aircraft. You find yourself at 30,000 feet [10,000 meters] out of radio contact, out of ammunition, almost out of fuel, and your radar warning indicates "lock-on" by incoming missiles from the God-Hating infidel dog enemy aircraft. You should:
 - A. Proceed, since you have utmost confidence that your high-tech on-board jamming system and chaff dispensers can easily trick and disarm all inferior incoming infrared, heat seeking, laser guided, radar homing and anti-radiation missiles closing at an effective approach of 3200 miles per hour.
 - B. No matter what, save face and don't back down.
 - C. Try to maneuver your wingman between you and the infidels.
 - D. Praise ALLAH and declare victory!
4. You are blessed enough to be a member of 4th Battalion of your leader's elite Republican Guards. In the rare moments when you have raised your head out of your foxhole defilade, you have observed infidel aircraft swarming over nearby 3rd Battalion, like flies over Camel dung. By the rockets' red glare you become aware of the flyers which are now raining gently down upon you position. They say, "Republican Guards of the 4th Battalion, what you saw tonight will be repeated tomorrow on YOUR position". You should:
 - A. Attempt to tunnel to Jordan.
 - B. Kiss your paramour in the next foxhole good-bye.
 - C. Decide it's time you made a liaison visit to 5th Battalion, some 10 kilometers up the road.
 - D. Praise ALLAH and declare victory!
5. You are part of a peaceful anti-Imperialist air defense gun crew that has been recently relocated to a peace-loving housing complex (to provide better area coverage). Your position is cited between the holy mosque and some ancient archeological ruins of renown (to facilitate your religious and historical desires). During the night, while you are blindly punching holes in the sky with your 40 millimeter ack-ack, a TOMAHAWK cruise missile passes overhead at 400 feet. Simultaneously, you lose your grip on your bowels and your weapon, slamming 300 grams of excrement into your pajamas and 300 rounds of high explosive into the mosque and surrounding neighborhood. You should:
 - A. Claim a "kill" of a TOMAHAWK and, based on your heroism, see if you can be promoted to bottom-level door guard at the subterranean bunker.
 - B. Call your relatives to get them in early on the looting of destroyed homes before the area is cordoned off.
 - C. See if you can get your picture taken with Peter Arnett while he is brought around in the morning to view the latest infidel atrocity.
 - D. Praise ALLAH and declare victory!
6. Your state-of-the(Russian)-art aircraft is fueled and fully armed. All systems are GO and you are physically and mentally prepared to flame numerous ALLAH-hating infidels, whose aircraft light up your radar screen like a pin-ball machine as you launch into destiny. You should:
 - A. Carefully monitor all your instruments in case a red light flickers, in which case you will be compelled by military necessity to jettison all your ordnance upon your countryside and head for Iran at Mach-speed for an on-ground systems check.
 - B. Check your appointment reminder book. You may be due for an annual dental checkup, in which case you will have to abort your successful mission.
 - C. Take careful aim and launch ALL your missiles at the nearest Yankee devil-craft, some 80 miles away, and attempt to immediately return to base and shelter for rearming and await your next mission, next week.
 - D. Praise ALLAH and declare victory!

SCORING

All correct answers count 20 points. Any answer other than "D" is incorrect.
If you scored 100 or higher, CONGRATULATIONS! You are ready to go to paradise!
If you scored 60 or higher, you are ready to drive SCUD peace-keeping truck.
If you scored lower than 40, your unfaithful carcass will rot in the stinking desert!
May your actions forever be blissfully guided by S.H.I.T.
